INTRODUCTORY.

This is the fourth revised annual edition of R. L. Polk & Co's Colorado Springs, Colorado City and Manitou City Directory. It contains 741 pages—an increase of 36 pages over the last edition issued a little over a year ago. The number of individual names in this volume is 19,372 (names of corporations and firms; death and removal notices are not counted). By using the very conservative multiple of 2½, we estimate the present population of Colorado Springs, including Colorado City, Manitou and the suburbs, to be 48,430.

The information contained herein has been recently secured, and no expense has been spared in gathering full and complete data to make every department of this volume reliable and up-to-date in every respect. The compilation, checking, printing and binding has been pushed to completion as rapidly as possible, still this year's directory comes out of our bindery somewhat later than the previous edition. We will hereafter begin the canvass earlier, and issue our directory not later than June 1st every year.

Attention is directed to the Index to Miscellaneous Information (pages 12 and 13), in which is noted the page on which any information desired can be found. This index should be consulted by all until they become thoroughly familiar with the several departments of the work.

We again call the attention of the residents of the city and the traveling public to our Library of Directories, maintained in our offices in the Hagerman Building, and which is kept up-to-date. These books are for free reference, and the public in general is invited to use them at any time.

We thank our patrons for their patronage, without which it would be impossible to publish a work of this kind, and also thank the public in general for their co-operation in furnishing our representatives the desired information concerning themselves and their business for insertion in this volume.

DESIGNERS, PHOTOGRAPHERS, ENGRAVERS, ELECTROTYPERS,
 COLORTYPE and CATALOGUE PRINTERS. We have just installed
 an entirely new electrotyping outfit, with the celebrated Dr. Albert Galvano Lead-
 molding Process, which produces electrotypes of the finest half-tones, absolutely
 duplicating the originals, rendering the making of duplicate half-tones unnecessary, effecting a
 large saving of expense, and insuring perfection in press work. The value of this feature is
 appreciated by all who have had experience in getting out large editions of illustrated catalogues
 and booklets where economy demands the printing of several sets at a time, as by the using of this
 process nothing is lost in the duplication of the most delicate engravings. Ours is the only foundry
 west of New York with this equipment.
